

# Oracle

Every business uses databases. Oracle is the world's premier database software.

Acxiom, central Arkansas' global data company, asked Oracle to train students to become potential Acxiom employees.

NPCC's Oracle Academy is designed to do that, and more!

**Prerequisites:**  
good computer skills

CIS 2033, Course ID#1139

# Oracle

Technical experience is helpful and recommended.

You'll do well to take this opportunity to gain knowledge and hands-on skills with Oracle products and technology for the path you are pursuing. A combination of product experience, technical job experience and certification will ensure broader career opportunities for you.

Program details at [academy.oracle.com](http://academy.oracle.com)

## Certification Available

This course in Database Design, along with the 2<sup>nd</sup> Academy course in SQL Programming, will qualify students to take the Oracle Certified Associate Exam 1.

No textbook is required; the entire curriculum is hosted on Oracle's servers, which can be accessed anywhere (high-speed internet connection recommended).

Weekly virtual chat sessions give students the opportunity to ask questions and clarify concepts.

Course dates:  
Aug. 20 – Dec. 8, 2009
