Bonus Lessons Assignment D

Use your Bonus Lesson handouts to make corrections to the photos as indicated. For each photograph, open the original. You will work in PhotoShop format; therefore, immediately save the photo as **Your Name Bonus 1.psd** in your homework folder. Make all the necessary adjustments to the image. Save the image again. Close the image.

A “before” and “after” printout would be an impressive addition to your professional portfolio. Your instructor will demonstrate the printing technique (File, Automate, Picture Package) to be used. These printouts will NOT be turned in. On the due date, you will post your photos to a location designated by your instructor. She will view your images for evaluation. Images must be posted at the BEGINNING of class on the due date, or your assignment will not be accepted.
