

## **Introduction to Computing I**

### **Terms, Lesson 8**

Refer to page 153 in your textbook. Locate the Vocabulary Review terms in the blue box. Write the correct term in the statements below:

1. \_\_\_\_\_ displays the contents of your computer. You can see the hardware devices, resources, programs and files stored on your computer.
2. A \_\_\_\_\_ functions as a pointer to an application or document file, wherever the file is located.
3. A \_\_\_\_\_ is a predefined set of icons, fonts, colors, sounds, and other windows elements that give your desktop a unified and distinctive look.
4. A \_\_\_\_\_ is a utility program that allows you to perform a task quickly and easily such as adding a printer.
5. You open the \_\_\_\_\_ to change settings on your computer and customize the display, by selecting it with the Start Menu.
6. \_\_\_\_\_ is your personal folder where you can save the files that you create and use.
7. Icons on your desktop that serve as a shortcut to applications or documents are known as \_\_\_\_\_.
8. \_\_\_\_\_ lists all of the computers on your network, if you are connected to a network.
9. You can change the \_\_\_\_\_ that covers your desktop to another picture or pattern that comes with Windows or with your own photograph or artwork.
10. \_\_\_\_\_ is a Web browser with communication capabilities for sending and receiving e-mail, connecting to the Internet, designing your own web site, and teleconferencing.
